PROFILE

Hard-worker & creative.

I tackle technology from the human experience point of view. I love designing information systems to help companies work faster and more efficiently.

EXPERIENCE

OM-LAB, United States-Uruguay (Freelance/Remote) - Full Stack Developer & Team Leader

APRIL 2020-PRESENT

- I got to test my skills on **project** and **remote team managing**, achieving a ratio of success.
- Lead several e-commerce projects in which my role was not only as a developer but also as a **team leader**, obtaining experience in **client-team communication**.
- Through daily interaction with **USA clients**, I got the chance to improve writing and speaking **english communication**. Moreover, I tackled different challenges; dealing with deadlines, estimation and unexpected issues that gave me the ability to know the product process.
- I've acquired great experience with **Frontend** (CSS, HTML, JS), creating web pages for big companies and various **Shopify** projects. Additionally, I worked along with the [design team](#), implementing distinguished user experiences.

Agile Software, Salto, Uruguay - Full Stack Developer

APRIL 2019-DECEMBER 2019

- I've worked on three different projects with the developing team to give support to mobile apps by implementing **REST** api services and **web pages**. At the same time, I have accomplished server managing tasks as well as design and maintaining databases.
- I got to improve on my code quality and velocity while leading and teaching other developers, besides getting deeper knowledge with **Django** while applying agile developing with **Scrum**.
- My work was mainly focused on **Backend**, yet developed **Frontend** to learn the basis of my skills.
